- Coffee outperforms any other product on a monthly basis with tea as a second choice for most customers .

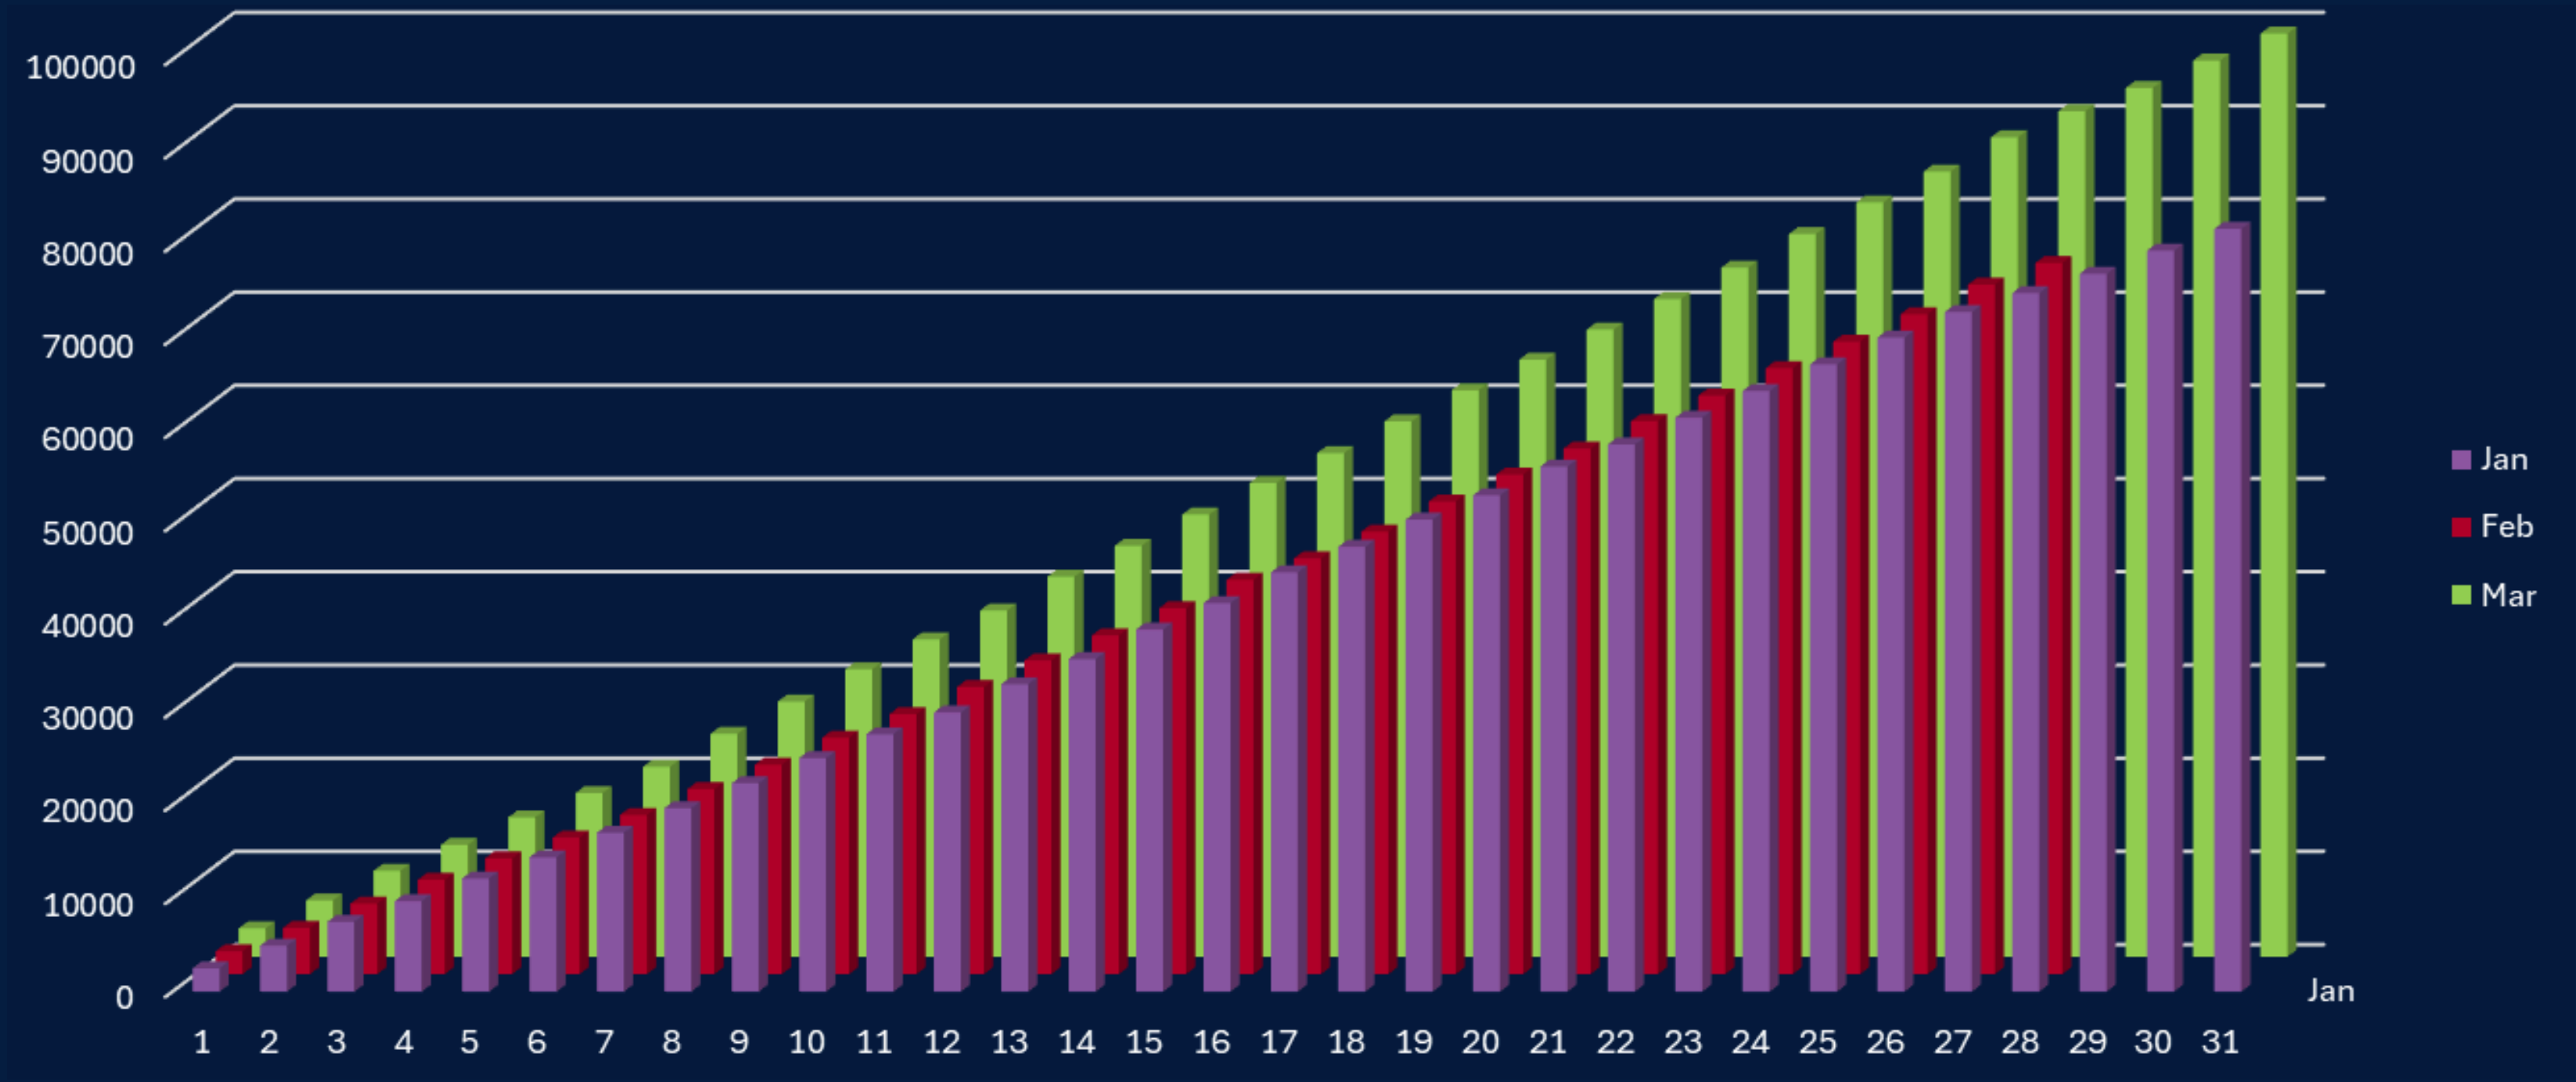

Quantity by product category

- Coffee is the most preferred order of choice among most customers.
- Tea is second choice preferred product from the stores.
- The ratio between coffee and packaged chocolate is 1:4

Cumulative Revenue

Day to day cumulative revenue for 3 months

- All three shops experience a consistent rise in revenue month to month.

Recommendations and Initiatives

Marketing

Build brand awareness on some of the underperforming products. Storytelling is a marketing tool used by franchises so customers can associate with the brand

Infrastructure

Infrastructure is the most important component for growth. Bright coffee shop needs customers who also want to stay longer and do their work. Have wifi, charging spots, and a bigger space.

Campaigns

Target university and corporate districts. Bright Coffee Shop must conduct a market research on the two target market and address their needs

Discounts

Offer discounts to promote products that are not doing well, and have a customer loyalty programme for your customers where you offer exclusive deals

On-Shelf Products

Commercialise some of the Bright Coffee Shop products that have potential and place them at chain stores and convenience stores

Corporatize

One of the best way to reduce costs maximise financial and human capital is to standardise the functions of the the business. Bright Coffee Shops will reduce redundancy and ensure efficiency and effectively

Food delivery apps

Sign up for food delivery apps like uber eats and MrD food. Such a platform gives access to millions of customers who love convience.

Combos

Attach less performing products to high performing products in terms of sales to introduce customers to other products on offer

Product variety

One of the best way to survive or attain a competitive advantage in the food industry is to have a wide and unique range of products.
